

# **NEW** *from the* **National Cancer Institute**

The National Cancer Institute announces new publications addressing radioactive iodine (I-131) from fallout. The materials are designed to address the concerns of Americans who were exposed to I-131 from above-ground nuclear testing in the 1950s and early 1960s. People exposed to I-131, especially during childhood, may have an increased risk of thyroid disease, including thyroid cancer.

For More Information

- Call the NCI's Cancer Information Service at **1-800-4-CANCER** (1-800-422-6237).  
Persons with TTY, dial 1-800-332-8615.
- Visit the NCI's Web site at **[www.cancer.gov](http://www.cancer.gov)** (search term I-131).
